PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience in AWS cloud, Linux, Docker, Kubernetes, Jenkins, and GitHub Actions. Experienced in building CI/CD pipelines, automating AWS infrastructure using Terraform, implementing GitOps deployments, and deploying containerized applications to Kubernetes. Hands-on experience with AWS disaster recovery, monitoring, security scanning, and cloud-native infrastructure, with strong Linux, networking, Bash, and Python fundamentals

SKILLS

Cloud: AWS (EC2, VPC, IAM, S3, RDS, ECR, ECS, EKS, ELB/ALB, Auto Scaling, Route 53, CloudWatch)

CI/CD & GitOps: Jenkins, GitHub Actions, Maven, Argo CD, GitOps

Containers: Docker, Docker Compose, Kubernetes, Helm

IaC & Configuration: Terraform, Ansible

Security & Monitoring: SonarQube, Trivy, Prometheus, Grafana, Alertmanager

Version Control: Git, GitHub

Web & Database: Nginx, Apache Tomcat, MySQL

Scripting & OS: Bash, Python, Linux, Ubuntu, Amazon Linux

Networking: TCP/IP, DNS, HTTP/HTTPS, SSH, Load Balancing

PROJECTS

AWS Multi-Region Disaster Recovery Platform

Tech Stack: Terraform, AWS, Python, CloudWatch, Route 53, RDS, S3

GitHub

- Architected and automated a multi-region AWS disaster recovery platform with Terraform, provisioning VPCs, private/public subnets, NAT gateways, ALBs, EC2 Auto Scaling, and RDS MySQL across primary and DR regions.
- Implemented cross-region resilience and data protection using RDS read replicas, S3 Cross-Region Replication, S3 versioning, AWS Backup, and KMS-encrypted database storage.
- Automated DR failover and recovery using Route 53 health checks/failover routing and Python AWS Lambda to activate DR compute, promote the database replica, and coordinate recovery actions.
- Built CloudWatch monitoring and reusable Terraform modules for networking, security, compute, database, backup, DNS, replication, and observability; designed for RPO 15 min and RTO 30–60 min with documented failover validation.

TaskFlow Application — GitOps & DevOps Project

Tech Stack: Docker, Kubernetes, Argo CD, GitHub Actions, AWS

GitHub

- Developed and containerized a full-stack task management application using React.js, Node.js, and MySQL.
- Implemented a GitOps workflow using Kubernetes and Argo CD, with Git as the single source of truth for automated application deployment and synchronization.
- Built CI/CD pipelines with GitHub Actions and deployed on AWS EC2, reducing manual deployment efforts and ensuring consistent, reliable releases.

Java Shopping Cart – CI/CD & Production-Style DevOps Deployment

Technologies: AWS EC2, EKS, Java, Maven, MySQL, Docker, SonarQube, Trivy

GitHub

- Designed and implemented a complete CI/CD pipeline using Jenkins to automate source code checkout, Maven build, unit testing, SonarQube code analysis, Docker image creation, security scanning, and deployment.
- Containerized the Java-based Shopping Cart application and MySQL database using Docker, ensuring consistent application environments across development and deployment stages.
- Deployed the application on Amazon EKS using Kubernetes Deployments, Services, ConfigMaps, Secrets, and NGINX Ingress; configured containerized MySQL with persistent storage and application-to-database connectivity.
- Implemented security and quality controls using SonarQube for code quality and Trivy for container vulnerability scanning within the CI/CD pipeline. Improved deployment reliability with an automated Jenkins-to-Kubernetes delivery.

EXPERIENCE

DevOps Intern - PearlThoughts — Remote

sept'25 - oct'25

- Built and maintained CI/CD pipelines using GitHub Actions and Jenkins, automating application build and deployment workflows.
- Provisioned and updated AWS infrastructure with Terraform, including EC2, VPC, IAM, and networking resources.
- Containerized applications with Docker and deployed workloads to Kubernetes development and staging environments.
- Collaborated with development teams to improve deployment reliability and automate recurring operational tasks.

CERTIFICATIONS

- AWS Certified Cloud Practitioner (2026) – AWS Cloud fundamentals and best practices. [Verify](#)
- AWS Academy Cloud Architecting (2025) – Cloud architecture and AWS deployment fundamentals. [Verify](#)

EDUCATION

Bachelor of Technology (B.Tech), Information Technology

July 2021 – May 2025

Institute of Technology and Management (ITM), Gwalior

CGPA: 7.22/10.0
